como garantia de su legitimidad cada botella
lleva nuestra marca registrada, colorado y
blanco a lienas.
Bitter Angostura (sino legible). Cho-
colates y cremas "Gallucci" Oporto y Jere-
z "Sandan". Whisky "Black & White".
Belle "Astor y Mouton". "Gallucci".
Dulces y Caramelos "Kaiser". Rom Anis-
to "Gallucci". "Old Tom". "Gallucci".
Jamon y Ostras "Chamcho". Champana-
"Bugeon". "Gallucci".
Lenguas de Payandem. Salsas aromatiza-
das de "Wolfe". Vino puro frances "Morion".
Tobacco "Pinar".

"La Patria"
"Erin-go-Bragh"
"La Argentina" "La Criolla"
"La Portena"
Registered trade marks of
TEAS, in 12 and 6 lbs
boxes.
Packed in China and received
direct, by
PARRY & CO.
BUENOS AYRES.

NOTE—See that the boxes
bear the registered trade mark
and have not only the words
"with and you will be sure of
getting your tea unadulterated
with common stuff and dried
rose leaves."

SUNDAY, JANUARY 19 1890.

Telegrams.
HAVAS
Paris, 17th (evening).—The influenza
epidemic is rapidly declining everywhere.
Here it has completely disappeared; and
in Italy, Spain and Russia it is very mild
and quite harmless.

Madrid, 18th (evening).—Efforts
are being made to induce Sagasta to re-
sign the premiership; but he has given up
the attempt, and Alonzo Martinez has
accepted the task of forming a Ministry.

Rome, 18th.—Prince Amadeo, Duke of
Aosta and brother of the King, is very
seriously ill.

By buying is the key to success, the Argenti-
ne Republic has turned out some good
reaches. The climate conditions are
very different than those of our country,
and it takes time to "naturalize" a horse,
as a rule, though some of the expatriates
take to the change like a duck to water.
The influenza epidemic is rapidly declining
everywhere. Here it has completely disap-
peared; and in Italy, Spain and Russia it is
very mild and quite harmless.

Justice has thrown light on the Flores
poisoning case. The criminal is the Indian
girl of 14, who confessed that she put
poison in the food to be revenged on the
little girl who died and on her mistress
who illustrated her. The girl seems to
have no idea whatever of the enormity of
her crime.

We feel sincere pleasure in again in-
forming you that the Rev. Dr. Rev. Dr.
Francis Smith, A.M., after a five years
absence in Europe, "We are glad to see
him in the very best of health. His former
parishioners will have an opportunity of
seeing him this morning in St. John's
Church at 11 o'clock.

We feel much pleasure in congratulating
Captain C. Bateman, of the Eolo, on his
deserved promotion to the high post of
Inspector of the Platense Fire Company.
Captain Bateman is a well known and liked
man at the Platense Company are most
fortunate in securing the services of a gen-
tleman who shines alike by his competency
and popularity.

We cordially greet our new Sunday list
to Messrs. Jacobson and Co. for the New
Year's Gift they sent yesterday—a copy
of Whittaker's Almanack, and the first
of its kind in the world. Messrs. Jacobson
and Co. have only received a limited num-
ber of copies, so a before-breakfast trip
to the store to-morrow is advisable for
those who want the invaluable vol-
ume.

The electrician is a good soldier. He
knows how to charge a battery.
The Mount papers say that the palace of
the defunct General Santos is being touch-
ed up, and there are strong suspicions in
the minds of the people that the bones of
a wedding. Such is life.

For some throat people some slices of ham
fat, or fat bacon, and bind on the throat
with a flannel cloth.
Old English residents will remember the
cattle plague of 1817, and will feel inter-
ested in the following paragraph from the
European Magazine. "The surviving officers of
Her Majesty's ship Bombay (built in the
River Plate on December 14, 1864) dined
together at the Hotel Metropole on Mon-
day, December 18. There were present:
Admiral Kelly, Captain de la Combe,
Captains Carr, Lang, Fullerton, Poole,
and Phillips; Lieutenants Bridges, Day, and
Hawley; and Messrs. Mackenzie and Man-
gill, Colton, Holman, Harland, Mandville,
Stephenson, and Thomson.

We have received a letter from Mr. E. P.
Goodall, of Bahia Bana, asking us to
make inquiries about a young girl named
Ryan, aged 18, whose mother, Hannah
Ryan, an Irish emigrant by the Dresden,
is in very great distress as to her fate. She
left her daughter in a situation here, in
charge of two other girls, but the girl left
the same time, and went to a lodging-house,
and for several months her mother has
heard nothing of or from her.

The two fugitives, Olivia and Paraguay
seem to be quarrel about boundaries.
The former has sent the latter almost an
ultimatum. Better settle the matter
ultimately, and settle the matter quietly.
Gorilla Island near Montevideo, is over-
run with rabbits. If a few of them manage
to get to the mainland, the fate of Aus-
tralia will be overtake B.O. The rabbit is a
plague everywhere, except on a dish, with
some boiled Luncheon bones.

The influenza has attacked several Ar-
gentine families in Paris and Rome,
among them those of Dr. Wilde, Lastra,
Bilbao, Urquiza and many others.
Justice has thrown light on the Flores
poisoning case. The criminal is the Indian
girl of 14, who confessed that she put
poison in the food to be revenged on the
little girl who died and on her mistress
who illustrated her. The girl seems to
have no idea whatever of the enormity of

Gorilla Island near Montevideo, is over-
run with rabbits. If a few of them manage
to get to the mainland, the fate of Aus-
tralia will be overtake B.O. The rabbit is a
plague everywhere, except on a dish, with
some boiled Luncheon bones.

A woman of 48 (spinster), living in Calle
Lopez, elapsed yesterday with her com-
panion, a young man, and was found dead
in the street. The young man was employ-
ed in a barber's den in the neighborhood.

The highly amusing telegram about the
intention of the Portuguese merchants to
boycott the railway line of the Province of
Rio Grande del Sur, has been decided neg-
lected. And yet they aspire to govern a
large part of Africa.

There were some errors which require
correction in our article "Cost of Govern-
ment" yesterday. In the 39th line the
year should have been 1888; and in the
fourth and fifth lines from the end of the
column the ratio per head at large
were 68 shillings" etc.

We have to thank Messrs. Negrebat & Co.
for late papers from England, illustrated
and others.

Dr. Brougham of Chicago is coming
here to start a meat factory. He will
probably find that our meat preserva-
tion is not so good as his. Our American
cattle are now so numerous that they will
soon eat their meat for themselves,
and must leave the export trade to this
country and Australia.

A very curious case is current in London
concerning Prince H. of Batavia
long, Princess Batavia's husband. They
are temporarily estranged, owing to a lady,
a matrimonial agent, having claimed, un-
der an agreement made with the Prince be-
fore his marriage, a fourth part of the for-
tune he got with the Princess. It appears
that Batavia, when on the look out for a
wife, told the agent he did not care who
he married, provided she was very rich.
These "princely" sentiments must make
Batavia even more disliked than he is
already by the English people, if that be
possible.

The news of the intended dissolution of
Parliament has taken the English commu-
nity by surprise. It is a daring step of
the Government.

There will be a fine chance at the com-
ing Rural Society's Exhibition to pocket a
little cash. The Committee has promised
a prize of \$200 for the best essay on the
subject of the "mucic" subscribers will win.

We feel pleasure in stating Mr. R. Lett
of Guamini. He reports a tremendous
drought here; but outside a radius of ten
or fifteen leagues the crops are splendid.
This is a pity.

Some people say that of R. E. O. friends
may have a bit of a friendly study at
their Presidential election, and President
Tajon is taking military precautions. We
hope there will be no serious trouble.

The last fortnight of this month looks
likely to make advances for the first in
the Immigration line. The Cordoba and Pa-
taya have brought out by Professor

Government official to 412 inhabitants,
and that official costs on an average only
347 dollars annum; this sounds very cheap
indeed. He has all his ivory in
Waidia. However, when botanists have
done cackling their peans over a new
plant, and Exeter Hall has made the
most out of Stanley's "divinity", and the
geographers of South America have tried
their own importance in paying homage to
the great traveler, we shall have time to
re-examine the curious fact that explorers
in returning to civilization become dead,
and in some cases crazed. You remember
the poor Spoke, what a silly and he made
of it by dragging his gun after him
through a hedge in England soon after his
arrival from Africa. Stanley left here
January 21st, 1887. He left Zanzibar in
the month of the year for the month
of the Congo and going round the Cape
of Good Hope. He started from Stanley
Pool on March 18th for the Lakes—
a distance, I think, of only 400 miles.
Since then he has been more or less lost.
It is only within a week or two that we
have received any intelligence of him
and of Emin. If Stanley gets back to us
in January he will have been just three years
absent. To him it has been granted to
have seen the Kingdoms of gloom and sci-
ence and excitement. A scene of wonder
of and Herodotus' phantoms. Some-
times are already being mapped out in our
columns and straight lines in our engineers'
offices in Westminster. The Salvationists
are preparing a map for the equatorial
torrid and fat adoration talk of "Doo-
nicks."

You will have done "Jedi Davis" long
before this reaches you. I need only call
your attention to the long articles in the
press of this morning on the death of
the ex-president of the Southern Con-
federation.

The most important subject affecting
us here is the renewal of strikes and
the consequent loss of work. The
gas-workers seem unable to pay a dividend
of the gas to the Union gives the word to strike.
The public feeling is at present against
the men. The South Metropolitan Gas
Company, engineered by Mr. Liverly, have
forwarded a specimen plan that, like
Messrs. Paty & Co., they have offered the
company's profits. That is a quite right
thing to do, but it is a question of
dispute as to whether the company is to
be under the control of the shareholders
or of the public. The authority of Portugal
has been enforced beyond the immediate
neighborhood of her stations on the coast.

On the course of the Zambesi itself
the Portuguese are not established by
monumental stations of any importance—
one at Tete and the other higher up at Zumbo,
the latter of which had been again and
again abandoned and was at no time the
center of any activity except at the time
when the river was in flood. The ground
was weakly and doubtfully held, the ground
on which the Portuguese Government have
proposed to extend their nominal power
practically across the whole continent from
the Atlantic to the Indian Ocean.

The Board of the Southern Railway
have applied for authority to lay a double
track between San Vicente and Altamirano.
This line would start from the eastern side
of a viaduct would be built across the
unbroken and flat lands from the station
of Zumbo, the British station, to the
station of the Zambesi from which the north
of it on the river Shir and on Lake Nyasa,
which, by the connection with Lake
Tanganyika, is now possibly on the way
to the Indian Ocean.

of Zumbo, the British station, to the
station of the Zambesi from which the north
of it on the river Shir and on Lake Nyasa,
which, by the connection with Lake
Tanganyika, is now possibly on the way
to the Indian Ocean.

The Board of the Southern Railway
have applied for authority to lay a double
track between San Vicente and Altamirano.
This line would start from the eastern side
of a viaduct would be built across the
unbroken and flat lands from the station
of Zumbo, the British station, to the
station of the Zambesi from which the north
of it on the river Shir and on Lake Nyasa,
which, by the connection with Lake
Tanganyika, is now possibly on the way
to the Indian Ocean.

whom our lot is cast, and we shall then
find that the present minister of foreigners
is but the logical outcome of past facts and
present circumstances.

The Paraguanian peasant is ignorant. He
is ignorant to an extent which we can barely
conceive of. It is so difficult as to be
practically impossible for most men of the
19th century imbued with the traditions
and instructed by the histories of thou-
sands of years to put themselves by any
mental effort in the place of these men of
yesterday, who can neither read nor write
who know no history but that of their own
lives and that only of a few years back; for
whom superstition stands in place of
religion and who are best at
every turn of their lives by superstitious
fears, whilst encouraged to the right by
merely the vaguest hopes of reward.

What can we expect from these people
whose knowledge of right and wrong is an
emotion, not an act of intellectual reason-
ing, and whose ideas are not clear nor
sharply defined on any point except on
that of the punishment of crime? They are
vix immediate and easily obtainable peo-
ple. We are to expect at present from such
people a hearty and willing cooperation in
all our far-reaching projects, the advantages
of which are not in many cases to be re-
alized for years. The only possible disprop-
orties of these ideas is the practical one I am
now urging, viz, we must undertake the la-
bours necessary for the successful coloni-
zation of the country, and instead of dis-
paraging the Paraguanian we should make
endeavour to understand him and to treat
him according to the measure of his intel-
ligence. We must prove to him by his ex-
perience that we do better the poor man's
condition, whilst the increased revenues of
the Government at home and their better
credit abroad will be proofs of the good
done to the country at large. By adopting
such a course as this we should gradu-
ally win the confidence of the people, and
we should convert our distrustful Paraguan-
ian into a willing cooperator, thus doing
of our last obstacle to improvement.

There was tremendous news from
Lisbon last night. Portugal is determined
not to be bullied by England; and all the
"Portuguese non-war" aloft have been
ordered to Zanzibar to crush Admiral
Wells' squadron.

We call attention to an advertisement
from the Base Ball Club in another
column, and hope none of the members will
have been enough to be absent from the
team.

ARGENTINE AGRICULTURE.

In the absence of official statistics, it is impossible to give an accurate picture of the agricultural production of the Argentine Republic. It is high time that the National Department of Lands and Colonies should start a series of investigations into the state of the various branches of agriculture. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information.

big San Rafael mountains. But this ought not to deter hardy settlers. The Argentine Republic is a vast country, well-known to the world. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information.

Wheat..... 1,000,000
Maize..... 1,000,000
Flax..... 1,000,000
Cattle..... 1,000,000
Horses..... 1,000,000
Sheep..... 1,000,000
Goats..... 1,000,000
Pigs..... 1,000,000
Bovine..... 1,000,000
Equine..... 1,000,000
Caprine..... 1,000,000
Ovine..... 1,000,000
Porcine..... 1,000,000
Canine..... 1,000,000
Feline..... 1,000,000
Ursine..... 1,000,000
Murine..... 1,000,000
Rodentia..... 1,000,000
Insecta..... 1,000,000
Mollusca..... 1,000,000
Arachnida..... 1,000,000
Pisces..... 1,000,000
Aves..... 1,000,000
Mammalia..... 1,000,000

Thus there is to be at least two million tons of grain that must be exported. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information. It is not only of its existence but of its utility. Up to the present the Department has not given the public any reliable information.

Value.

PARAGUAYAN LETTER.
To the Editor of the STANDARD.
But my object is not so much to describe the remnants of old Missions as to write a few lines to the people of the Argentine Republic, to speak of its fertility and healthiness, to show the progress of its civilization, and to point out the advantages of its climate and soil for the settlement of people who are not afraid of the solitude, and who will be able to make a comfortable living in a few years.

SANTA FE STATISTICS.

The new year has been ushered in with much an auspicious of statistical figures. The statistics of the Province of Santa Fe for the year 1889 are as follows: The population of the Province was 1,000,000. The area of the Province was 1,000,000. The production of the Province was 1,000,000.

GOVERNOR GALVEZ ON THE CRISIS.
On the occasion of the opening of the Legislature, the Governor of Santa Fe, Sr. D. Manuel Galvez, delivered a speech on the crisis of the Province. He said: "The Province of Santa Fe is in a state of crisis. The population is decreasing, the area is being lost, and the production is falling. We must take immediate action to remedy these evils."

On the occasion of the opening of the Legislature, the Governor of Santa Fe, Sr. D. Manuel Galvez, delivered a speech on the crisis of the Province. He said: "The Province of Santa Fe is in a state of crisis. The population is decreasing, the area is being lost, and the production is falling. We must take immediate action to remedy these evils."
